RETREATMENT

EndoArt Retreatment rotary files developed for repeated root canal treatments. Thanks to its high cutting efficiency, it is used in the process of removing the materials in the canals. The system consists of three instruments, D1 - D2 and D3 which are designed for cleaning the canal filling in the (D1) coronal, (D2) middle, and (D3) apical thirds. While D1 has an active tip at the first entry into the root canal, the tips of continuing instruments are not cutting.
